Journal Selection Report

The Journal of At-Risk Issues (JARI)

Manuscripts should be written clearly and concisely for a diverse audience, especially educational professionals in K-12 and higher education. Topics appropriate for The Journal of At-Risk Issues include, but are not limited to, research and practice, dropout prevention strategies, school restructuring, social and cultural reform, family issues, tracking, youth in at-risk situations, literacy, school violence, alternative education, cooperative learning, learning styles, community involvement in education, and dropout recovery. Research reports describe original studies that have applied applications. Group designs, single-subject designs, qualitative methods, mixed methods design, and other appropriate strategies are welcome. Review articles provide qualitative and/or quantitative syntheses of published and unpublished research and other information that yields important perspectives about at-risk populations. Such articles should stress applied implications.

Journal of Education for Students Placed at Risk (JESPAR) IF1.04

The only academic journal to date which provides quantitative, qualitative, or mixed-method research focused exclusively on improving the education of students placed at risk, which are students who are at danger of not succeeding in school due to disadvantaged circumstances. JESPAR prioritizes manuscripts of studies that (1) provide impact evidence of interventions, strategies, or methods to ameliorate risk, or (2) examine innovative schooling structures and school practices that improve the achievement or correlates of achievement of at-risk students, or (3) present new models for improving the precision of predicting risk and/or future success in school. The journal is focused on elucidating the malleable factors that, if altered, can change the course of a student's educational outcomes. The journal does not publish articles that are more suited for special education journals, but it will consider studies in which special education status coexists with disadvantaged circumstances or where students at risk are placed in special education services. JESPAR facilitates communication among all stakeholders--researchers, policymakers, and educators--who are actively involved in furthering academic and other achievements of students placed at risk.
**National Youth-At-Risk Journal (NYAR Journal)**

Open-access, peer-reviewed online journal that publishes educational articles on how to reduce harmful risk conditions and promote the well-being of all youth, especially vulnerable youth in schools, families, and communities.

Individuals are welcome to contact journal editor (nyarjournal@georgiasouthern.edu) with any questions about the submission process or to seek feedback on a submission idea (1-2 paragraphs maximum).

**International Journal of Inclusive Education** IF 1.053

The International Journal of Inclusive Education provides a strategic forum for international and multi-disciplinary dialogue on inclusive education for all educators and educational policymakers concerned with the form and nature of schools, universities and technical colleges. Papers published are original, refereed, multi-disciplinary research into pedagogies, curricula, organizational structures, policy-making, administration and cultures to include all students in education.

I also think you should consider publishing a Hebrew version of the article in מיקום reklamacji. I know the editor and would be happy to introduce you personally.
